

## PUR Hot Melt Tank System HB 4000 serial

**BÜHNEN**

**PUR Hot Melt Tank System  
HB 4000 serial**

The PUR hot melt tank system of HB 4000 serial combines innovative technology with convincingly reliability. This advantage cause to considerable lower cost of operation, higher duration and increase of production capability. In addition to the criteria of HB 4000 serial the PUR hot melt tank system presents following advantages:

**Advantages**

- Connection for automatic cover gas feeding
- Integrated adjustable bypass valve
- Progressive area of melting temperature

**HB 4004-4 MC**

**HB 4008**

**HB 4022**

Technical data							
model	max. number of pumps	tank size	melt rate*	max. discharge flow	number of hose connections	power unit	dimension l x w x h in mm
<b>HB 4004</b>	1	4,0 l	2 kg/h	38,4 kg/h	1-4	three phase motor with gear pump	720 x 360 x 510
<b>HB 4008</b>	2	8,0 l	6 kg/h	76,8 kg/h	1-4	three phase motor with gear pump	755 x 365 x 705
<b>HB 4022</b>	2	22,0 l	18 kg/h	76,8 kg/h	1-4	three phase motor with gear pump	940 x 480 x 1220

\*Depending on product: measured of a viscosity at approx. 2000 m Pas/175° C
