HB 220 SKI - GUN

Specially designed handgun for carrying out reliable professional repairs of scratches and surface damages of skis and snowboards.

The HB 220 Ski-Gun is a high performance pistol with a special PTFE coated nozzle for doing quick, efficient, and long lasting repairs of skis and snowboards. The flat head nozzle has its own heating element and is heated up to 300°C. The high temperature of the nozzle welds the repair material to the ski or snowboard base for ensuring a long-lasting repair. The special designed nozzle allows a quick, simple and economical application of the repair material.

Features:

- high melting capacity
- low weight and easy to handle
- mechanical stroke limitation to be able to apply a specific amount of glue repeatably
- to be able to adjust the trigger according to the size of the hand
- less fatigue through extended trigger
- Operating temperature adjustable
- integrated on/off switch

Technical Data:

Dimensions:	290 mm x 230 mm x 80 mm
Weight:	750 g
Operating Voltage:	220-240 VAC, 50 Hz
Power Input:	285 W
Insulation Class:	1
Protection Class:	IP 20
Working Temperature:	300 °C
